students are required to write a research proposal as a term paper.

**(Others (office hour, etc.) )**

Messages

This instructor differentiates “health communication,” which is mainly interested in doctor-patient communication, from “medical communication” with a broader, sociological focus; therefore, it is recommended that when interested in the aforementioned doctor-patient communication, s/he take other SPH classes.

Suitable for students who are interested in a social science perspective in medicine and science; therefore, his or her final paper contains such themes (or terms) as a “relationship, community, communication, society, psychology, etc.”

Consult with me ASAP for any disability-related accommodation
