<b>[Outline and Purpose of the Course]</b>					
<p>Violent activities of the terrorists have changed the whole situation of international health. The concept of human security is now given a high priority to the field activities of international health.</p> <p>In this course, after the outline of system and activities of the international cooperation/aid agencies, we invite international health/medical professionals to lecture on their own projects. At the same time, we focus on the process of the career path of each practitioner.</p>					
<b>[Course Goals]</b>					
<p>The purpose of this course is to expose the students with the different health situations bound by political, economical and cultural reasons in countries and help them to have ideas of contribution.</p> <p>At the end of the class, the students are required to know how to get useful and practical information of their prospective role and style for the future health/medical practice.</p>
