14 January 12 “ MBTI ” special workshop (2)  
15 January 19 Individual presentation and wrap-up  
Note: This schedule is subject to change.

### [Class requirement]

None (it is desirable to have basic knowledge of epidemiology or evidence-base medicine).

### [Method, Point of view, and Attainment levels of Evaluation]

Short report for each lecture 80%, Oral Presentation 20%

### [Textbook]

The material necessary for the lecture will be provided by lecturers.

### [Reference books, etc.]

#### ( Reference books )

Baruch Fishhoff, Noel T Brewer, Julie S Downs 『Communicating Risks and Benefits: An Evidence-Based User's Guide』 ( US Department of Health and Human Services, Food and Drug Administration )

### [Regarding studies out of class (preparation and review)]

Rather than spending more time on your preparation, please put more energy into the review.

### ( Others (office hour, etc.) )

Information is defined as “ those which reduce uncertainty ” . This course provides students with the opportunity to consider how to develop, transmit and utilize information appropriately. Moreover, the special workshop of the “ MBTI ” must benefit students to widen perspectives of personal pattern of information recognition, processing and communication.

This course is open to graduate students with the school of human health science.

\*Please visit KULASIS to find out about office hours.
